HD70 TruEnergy Heritage Door

Introduction

VHD70 TruEnergy doors provide the ideal solution for homeowners looking to create an art-deco or industrial style for external doors and internal doors and screening.

As well as homeowners, this product appeals to architects & specifiers working on larger refurbishments projects or listed building renovations where the requirement for replica slim line doors are required.

This modern, high-performance aluminium door system allows for slim, clean, contemporary style looks also contributing to allowing maximum light to flow throughout properties.

The VHD70 TruEnergy door system is a thermally enhanced, VHD70 is the perfect companion to VCW73 windows, for projects that specify super-slim sightlines to replicate old steel-look windows with a flush finish alongside high thermal performance and security.

This versatile residential/light commercial door system can be used as a front entrance door, side entrance door and rear entrance door and is available in both single and double door combinations.

It can also be manufactured to provide modern internal screening for domestic and commercial properties, to separate living, working and shopping spaces whilst maintaining high levels of natural light throughout a building.

The system is available in standard as well as non-standard colours, as well as dual-colour combinations.
